Experience

PRGC Group | Live
February 2025 – Present

Software Developer — *Canada*

- Developed The Bat Cage, a full-stack booking system (React + TypeScript) with real-time lane reservations and conflict detection, used by **500+ weekly users.**
- Built an **admin dashboard** to manage bookings, revenue, and customer activity — **cutting admin time by 40%**.
- Engineered a dynamic UI for slot availability, boosting customer satisfaction and **reducing failed bookings by 80%**.
- Provisioned scalable infrastructure with GitHub Actions, CDKTF, automating EC2/VPC setup and slashing **deployment time by 60%**.
- Led **CI/CD** and maintained **dev/prod environments**; ensured high code quality through testable design, peer reviews, and frontend best practices.
- Currently leading e-commerce and membership feature integration with Stripe, enhancing business growth potential.

KickFreight LLC
November 2022 – December 2023

Software Developer — *Remote, India*

- Led development of a real-time analytics dashboard using React, Chart.js, and REST APIs, improving site navigation and **increasing online inquiries by 25%**.
- Collaborated with cross-functional teams to translate business requirements into functional features, managing the product roadmap and driving a **7.3% boost in operational efficiency**.
- Participated in Agile sprints, conducted code reviews, and delivered secure, high-quality code, while presenting data-driven insights to align technical decisions with product vision.

Education

Dalhousie University
September 2023 - December 2024

Master of Applied Computer Science (GPA: 3.78/4.3) — *Halifax, NS, Canada*

- ***Relevant Coursework:*** Advance Software Dev Concepts, Data Management Warehousing & Analytics, Advance Topics in Cloud Computing, Adv Topics in Web Development, Cloud Architecting

Gujarat Technological University
July 2019 - June 2023

Bachelor of Engineering in Computer Engineering (CGPA: 8.5/10) — *Gujarat, India*

- ***Relevant Coursework:*** Data Structures and Algorithms, Operating Systems, Object Oriented Programming, Computer Networks, Design and Analysis of Algorithms, DBMS, Big Data Analytics, Web programming.

Skills

Languages: Java, JavaScript, Node.js, Python
Libraries/Frameworks: React, TypeScript, Redux, Context API, Next.js, Express, Angular, Babel, Webpack
APIs/Protocol/Tools: REST APIs, JSON, HTTP, Cursor, ChatGPT API, Figma
Cloud: AWS, Azure, GCP | **DevOps:** Kubernetes, Docker, Git, GitHub, Terraform, CI/CD, CDK
Databases: MySQL, NoSQL, MongoDB, RDS, DynamoDB
Certification: AWS Cloud Practioner

Projects

Blogsite | *ReactJS, NodeJS, Express, SNS, EBS, EC2, CloudFront, DynamoDB, S3, Secrets Manager, CloudFormation* | **Github**

- **Architected** a full-stack blogging platform with robust logging and monitoring capabilities.
- Formulated AWS infrastructure as code using CloudFormation, defining **25+ resources** including EC2 instances, load balancers.
- Configured comprehensive error tracking and performance monitoring through custom instrumentation.
- Optimized application performance using **CloudFront CDN** and implemented **secure data handling** with AWS Secrets Manager.

CareBridge | *Kotlin* | **Github**

- Led the development and created a user-friendly **Android application** for bridging the gap between senior citizens and family members. Researched about fall-detection algorithms and leveraged the use of gyroscope and accelerometer sensors.
- Utilized **Android's Instrumented Testing** for a few basic tests. Executed push **notification** using **Firebase FCM token**.

Jobly: Resume Analyzer Extension | *TypeScript, Google App Engine, Vertex AI, Chrome API, Webpack* | **Github** | **Live**

- Built Chrome Extension using TypeScript and **Google Vertex AI** to analyze resume-job description matches with **75+ installs**.
- Deployed scalable backend on **Google Cloud** with automated CI/CD pipeline.
- **Reduced bundle size by 60%** through Webpack optimization and Chrome API integration.
- Enabled resume parsing with **90% accuracy** using **Vertex AI NLP**, supporting **50+ uploads/day**.

Code Quality Report Analyzer | *React, Java, Python, Spring Boot, ChartJS, TDD, Solid Principles, CI/CD, Docker* | **Github**

- Created an intuitive React interface with a streamlined design and menu, enhancing user experience. Engineered a robust **CI/CD pipeline**, ensuring **automated testing** and **integration processes**, leveraging **Docker** for deployments.
- Implemented **Spring Boot**'s **microservices architecture** with Dependency Injection. Deployed a Java tool to address code smells.
- Enhanced **data analysis** and **visualization** by utilizing **Python** for advanced data processing and created interactive charts using **Chart.js** to visualize **code smells** and commits, increasing user engagement.
